Disclaimer

This is a limited report on our findings based on our analysis, in accordance with good industry practice as at the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, the details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report. While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER: By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice. No one shall have any right to rely on the report or its contents, and Rugfreecoins and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (Rugfreecoins) owe no duty of care towards you or any other person, nor does Rugfreecoins make any warranty or representation to any person on the accuracy or completeness of the report. The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and Rugfreecoins hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, Rugfreecoins hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against Rugfreecoins, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts alone. No applications or operations were reviewed for security. No product code has been reviewed.

Background

Rugfreecoins was commissioned by Harp Coin to perform an audit of the smart contract.

https://bscscan.com/token/0xe37ab1f60987cb4ac3c27918c11412f41460ab0b

The focus of this audit is to verify that the smart contract is secure, resilient and working according to the specifications.

The information in this report should be used to understand the risk exposure of the smart contract, project feasibility, long term sustainability and as a guide to improve the security posture of the smart contract by remediating the issues that were identified.

About the project

Harp Coin is a token built on the Binance Smart Chain. Each transaction, purchase and sale incur a 10% fee. The token was launched on Pancakeswap in May. The project is community-driven and with a real-world use case that the team is working on to enable De-Fi functionalities for mobile applications in a decentralized approach.

Features:

- ❖ Token distribution of 5%, which Harp Coin holders benefit through static rewards, that tokens will be distributed among every holder proportional to how many tokens each individual holds.
- ❖ The liquidity fee of 5%, which is a redistribution mechanism that ensures the trading pool always has sufficient liquidity. This is a key element for decentralized exchanges like Pancakeswap.

Tokenomics

- 5% of trade goes to holders pockets.
- 5% of trade goes to the liquidity pool.

Target market and the concept

Target market

- Anyone who's interested in Crypto space with long term investment plans.
- ❖ Anyone who's ready to earn a passive income by holding tokens.
- Anyone who's interested in trading tokens.
- Anyone who's interested in making financial transactions with any other party using HARP Coin as the currency.
- Anyone who's interested in using HARP coins as the subscription payment method for the mobile apps that will be enabled in the future.
- Anyone who's interested in staking through mobile apps and getting rewarded HARP coins.

Core concept

The static reward system

5% of tokens will be distributed among the holders per every buy and sell.

Sustainable mechanism

The liquidity fee of 5%, which is a redistribution mechanism that ensures the trading pool always has sufficient liquidity.

The plan

The HARP Coin team is working on a concept to replace the traditional subscription model already existing on the mobile applications. The team is building an API to connect wallets into the mobile applications in order to use HARP as the currency for business transactions like paying in HARP for subscription-based models.

This will enable use to

- Unlock features of the mobile app by paying in HARP.
- Disable ads by being a premium user.
- Be eligible to get rewards.

Staking will also be enabled in the future for the mobile applications so that users will get a specific percentage of HARP as a staking reward.

Potential to grow with score points

1.	Project efficiency	7/10
2.	Project uniqueness	7/10
3	Information quality	4/10
4	Service quality	710
5	System quality	7/10
6	Impact on the community	8/10
7	Impact on the business	7/10
8 Preparing for the future		8/10
Tota	6.88/10

ØÞ	Function is payable

Inheritance Hierarchy

Security issue checking status

- High severity issues
 No high severity issues found.
- Medium severity issues
 No medium severity issues found.
- Low severity issues

Hard code router address

Hardcoded uniswapV2Router address makes it impossible to migrate to a new version of DEX in case of future upgrades of PancakeSwap periphery.

Owner privileges

Ownership has been renounced and the owner doesn't have any privileges and has no authority to make any changes now.

Ownership privileges owner had

Owner can enable the trading and cannot disable it.

Owner can enable/disable liquidity add feature.

```
ftrace|funcSig
function setSwapAndLiquifyEnabled(bool _enabled1) public onlyOwner {
    swapAndLiquifyEnabled = _enabled1;
    emit SwapAndLiquifyEnabledUpdated(_enabled1);
}
```

❖ Owner can change maximum transaction amount.

Owner can change liquidity fee.

Owner can change tax fee.

❖ The owner can include/exclude accounts from fees.

Owner can include/exclude wallet from reward.

Owner can transfer and renounce the ownership.

Audit conclusion

While conducting the audit of the HARP Coin smart contract, it was observed that there is nothing alamaring with the code and the contract contains only a low severity issue.
